*"Success begins with good health."*

Al Amatzio President and CEO, AMSOIL INC.

The World's Best Multis and Longevity Enzymes

JANUARY 2010

## ALTRUM Puts You on the Road to Your Best Years Ever

Estimates link 90 percent of all physical ailments to lack of proper nutrition. AMSOIL Dealers get the nutrition they need with ALTRUM Nutritional Supplements. Here's what they are saying:

*"I have extra energy."*

*"I noticed the benefits immediately."*

*"This stuff actually works."*

*"I've noticed improvements with each one."*

*"I was able to endure the long days and constantly being on my feet."*

*"I would have been horizontal a long time ago without ALTRUM supplements. I only wish I could have started taking them sooner."*

### Why Choose ALTRUM Supplements?

The nutrients in ALTRUM products are specifically chosen to provide the best possible nutrition for your body.

ALTRUM supplements, derived from food sources, are readily digested so the nutrients become available to the body. "There's no other multiple vitamin on the market that has the 130 ingredients in our all-in-one *Ultra Multi*," said ALTRUM Manager Greg Sawyer.

### Discover For Yourself

Get the inside scoop on the benefits of ALTRUM Nutritional Supplements in an online show that's at your convenience whenever you want.

ALTRUM has posted a voice-over PowerPoint presentation (VOPP) that introduces each of the ALTRUM supplements.

Dealers can view the presentation at their leisure to learn the full benefits of the supplements and to speak confidently about them.

*Turn to page six for how to access the presentation.*

ORDER #: 1-800-777-7094 To Fax Your Order : 1-715-392-5225 or 1-715-392-5267  
Dealers and Preferred Customers can order at [www.altrumonline.com](http://www.altrumonline.com) or in the online store at [www.amsoil.com](http://www.amsoil.com).

# Nutrition Can Keep You Well

*Lack of proper nutrition may be linked to 90 percent of all physical ailments. \**

The biggest epidemic in America may be the lack of nutrients that comes from excess sugar consumption and makes the body susceptible to metabolic syndrome.

Metabolic syndrome is a cluster of health problems in one person. Although doctors don't completely understand its cause, high fructose corn syrup (HFCS) appears to be a likely suspect. This sweetener shows up in most processed foods and drinks.

Recent evidence suggests a large amount of HFCS in the diet might alter your metabolism in a way that increases the risk for illnesses that make up "metabolic syndrome."

## Studies Back HFCS Theory in Illnesses

In one study of more than 6,000, people who drank at least one soft drink each day had a higher risk for developing health problems compared with people who did not. Some scientists think the main culprit is the high-fructose corn syrup sweetener in these drinks.

Another study found women who had one or more sugary drinks a day were almost twice as likely to develop diabetes as women who did not.

## HFCS Depletes Body's Nutrients

High fructose corn syrup depletes the body's ability to deliver oxygen and nutrients to the tissues and causes many functions in the body to come to a standstill.

HFCS can contribute to diabetes, hypoglycemia, obesity and cardiovascular disease. It also triggers resistance to insulin, the cause of type 2 diabetes.

Other problems that occur when the body is forced to process large amounts of HFCS can be fatty liver, high blood pressure, artery disease, kidney troubles and high uric acid levels — the health problems that make up metabolic syndrome.

## New Choices Can End Metabolic Syndrome

Dietitian Gale Maleskey reports pre-diabetes, a symptom of metabolic syndrome, can be reversed with concentrated effort on several fronts. She offers the following recommendations:

- Exercise. Sustained low-to-moderate aerobic exercise is best. Work up to about 45 minutes, six days a week. Exercise reduces insulin resistance in muscle cells and lowers blood sugar levels. It also helps you to lose weight and keep it off.
- Cut back on sugar and refined carbohydrates. Instead, eat reasonable-size portions, lots of vegetables, salads,

and fresh, broiled fish, fruit for dessert, and olive oil as the main fat.

- Take supplements. **Chromium** is an essential mineral that can significantly improve glucose tolerance and even increase the number of insulin receptors on cells.

**Magnesium:** In one study, people who got the most magnesium (most took supplements) cut their risk for pre-diabetes by about 30 percent. Magnesium also is associated with lower blood pressure and triglycerides, smaller waist circumference and higher HDL cholesterol.

**Vitamin D:** Low blood levels of vitamin D interfere with the proper function of insulin-producing cells.

**Fish oil:** Fish oil improves insulin sensitivity and lowers triglycerides.

**Biotin:** This B vitamin also enhances insulin sensitivity. Take biotin as part of a high-B complex or multivitamin.

"Think of pre-diabetes as an early warning signal," said Maleskey. "Exercise, dietary changes and nutritional supplements can all help you keep your blood sugar normal."\*

ALTRUM *Ultra Multis* provide all of these nutrients to help protect or restore your health except fish oil, which ALTRUM provides in its *Ultra Omega-3* fish oil capsules and *Nutritional Oils*, a balanced mix of essential fatty acids.

Look for more information about how you can avoid metabolic syndrome in a future issue of ALTRUM News.\*
